

# Technical Requirements

The prerequisite for successful integration is that you have installed the standard pixel version 3.3.4 or higher.

## Browser Support

The Product List Tracking plugin uses the "querySelector"-method to search for the products to be measured. The following browsers support this method:

- Internet Explorer from version 8
- Microsoft Edge
- Firefox from version 3.5
- Google Chrome
- Safari from version 3
- Opera from version 10
