

# Error Codes

Error Code	Message	Description
200	OK	The response body includes all found segments and URM categories belonging to the user specified in the request.
400		(only Version 1) The placement could not be found. The placement ID could not be found. This means either that the placement ID does not exist or that it is not an Audience API placement.
400	No segment data available yet	(only Version 2) It is a new Visitor or the Inkognito Mode is activated
400	No Cookie available	(only Version 2) Cookie Storage is blocked. In this case there is no Cookie data available.
401		The account ID could not be found.
403		The Audience REST API is not activated for this account.
404		The user could not be found.
